EXPERIENCE

IT Intern — Quality Assurance Division, USeP, Davao City

JUNE, 2024 - DECEMBER, 2024

- Developed a full-stack web application using Laravel and React to digitalize and automate internal quality audit workflows for a university environment.
- Streamlined the audit lifecycle by developing features to manage dynamic checklists, compliance reports, and audit summary reports.

PROJECTS

FraudSite — Capstone Project

Developed the full web platform of a dual-platform cybersecurity tool using Laravel and TypeScript, featuring a public-facing site integrated with the extension's scan and report logic and an admin system with RBAC, 7 modules, and full server and client-side pagination, filtering, sorting, and validation.

Internal Quality Audit System (IQAS) — OJT Project

Developed the dynamic checklist, audit report, and audit summary modules using Laravel and React (TypeScript) to digitalize the university's internal quality audit workflow. Designed and normalized the relational database, stress-tested stability for up to 150+ concurrent users, and produced full system documentation and user manual.

Pet Adoption — Academic Project

Built a full-stack pet adoption platform using Next.js and Prisma ORM, implementing CRUD operations, user adoption and review workflows, and admin pet management across 40 animal records, with scroll-reveal animations and a fully responsive UI.
